PROFILE

Software Engineer with a strong foundation in web development and a growing focus on data engineering and AI engineering. Experienced in building full-stack web applications using PHP and Node.js. Currently developing expertise in data pipelines, databases, and data-driven systems, with a strong interest in applying engineering principles to scalable data solutions.

EXPERIENCE

Front-End Web Development Intern 02/2026 – 03/2026

Elevvo Pathways - Remote

- Completed 6 front-end web development projects.
- Developed modern and responsive web applications using React, JavaScript, HTML, and CSS.
- Used Git and GitHub for version control.Github Repo: https://github.com/KareemH-1/Elevvo-Internship.

Achievements

MSA Deepminds Web Programming Course, *2nd place*

Awarded 2nd place in MSA Deepminds in Web Programming course for developing JobConnect, a full-stack web application as part of a team-based academic project.

EDUCATION

Modern Sciences and Arts University (MSA), 09/2024 – 07/2028 | Giza, Egypt

B.Sc. in Computer Science

General Grade: Excellent

GPA: 3.83

AI & Data Science – Microsoft Data Engineer Track, DEPI 11/2025 – 07/2026

- Learning and applying core data engineering concepts including data pipelines, data storage, and data processing
- Working with Python and SQL for data manipulation and analysis
- Gaining exposure to cloud-based data engineering tools and workflows

SKILLS

Technical Skills

- **Programming Languages:** C#, PHP, Python, C++, JavaScript
- **Data & Databases:** SQL, MySQL, PostgreSQL, MongoDB, SQLite
- **Data Analysis & Engineering:** Pandas, NumPy, Matplotlib, Apache Kafka, Apache Spark, Apache Airflow
- **Desktop application development:** Windows Forms, ElectronJS
- **Web Development:** HTML, CSS, JavaScript, JQuery, React, PHP, Node.js, ExpressJS
- **Tools & Systems:** Git, GitHub, Linux

PROJECTS

MSA Quality Assurance System

- Developed a full-stack academic quality system for MSA University along with my teammate using React, PHP (MVC/OOP), and SQL.
- Implemented grade appeal workflows, survey management, notifications, bulk CSV/XLSX import-export, and analytics dashboards built with chart.js with role-based access control (QA Admins, Deans, Module Leaders, Instructors, Students).
- Applied MVC architecture along with Strategy and Observer design patterns to create scalable processing and event-driven notifications.
- Github Link: *https://github.com/KareemH-1/MSA-Quality-System*

JobConnect, *A platform that connects recruiters with job seekers*

- Full-stack web application connecting job seekers and recruiters. Built with PHP, JavaScript, and MySQL
- *Github Link: https://github.com/KareemH-1/JobConnect*

Task Manager Desktop application

- Developed a cross-platform desktop task management application using Electron.
- Implemented CRUD operations using local data storage, and real-time task updates to enhance productivity.
- Designed a responsive, user-friendly interface with intuitive navigation for desktop users. •

GitHub Link: https://github.com/KareemH-1/Task-Manager-App-Electron

2D Top-Down Survival Game, *Unity, C#*

- Developed a 2D survival game with wave-based enemies, AI pathfinding, progression upgrades, and interactive UI feedback (HP bars, screen shake, particles).
- Implemented persistent saving system and scalable difficulty for engaging gameplay.
- LinkedIn post: https://www.linkedin.com/posts/kareem-ahmed-h_unity2d-gamedevelopment-csharp-activity-7370111232470822912-AQFr/

ExtraCurricular Activities

MSA ECPC Community, *Participant*

Engaged in workshops, problem-solving sessions, and competitive programming events to strengthen technical skills. and Competed in ECPC 2025, solving coding challenges
