Professional Summary

Software Engineering student at MSA University (GPA: 3.78/4.00) with hands-on experience in software development, cloud-based data engineering, and machine learning. Experienced in building full-stack applications, data pipelines, and database-driven systems, with a foundation in software architecture, API development, and object-oriented design. Interested in developing intelligent, data-driven software solutions that combine scalable engineering with AI.

Experience

Front-End Web Development Intern – Elevvo Pathways (Remote) Feb 2026 – Mar 2026

- Delivered 6 responsive front-end web applications within a structured internship program, translating task-based specifications into working React and JavaScript solutions.
- Built reusable UI components and responsive layouts using React, JavaScript, HTML, and CSS, ranking as a top contributor on the Elevvo Pathways leaderboard.
- Managed version control and collaborative code review workflows using Git and GitHub.

Education

Modern Sciences and Arts University (MSA) Sep 2024 – Jul 2028

B.Sc. in Computer Science | GPA: 3.78/4.00 | General Grade: Excellent | Giza, Egypt

Digital Egypt Pioneers Initiative (DEPI) – Microsoft Data Engineer Track Nov 2025 – Jul 2026

- Applying core data engineering concepts including data pipeline design, data storage, data engineering tools, and batch/stream processing.
- Working with Python and SQL for data manipulation, transformation, and analysis.
- Gaining hands-on exposure to cloud-based data engineering tools and workflows on Microsoft Azure.

AI and Machine Learning Foundations Level 1 – ITI Jul 2026 – Aug 2026

Machine Learning, Deep Learning, Neural Networks, Computer Vision

Projects

Healthcare Fraud Detection System Jul 2026

Microsoft Azure, Apache Kafka, FastAPI, SQL Server, Machine Learning, Docker

- Developed a cloud-based healthcare fraud detection pipeline for real-time insurance claim processing using event-driven services.
- Integrated Kafka-based event streaming with FastAPI services and SQL Server to support claim ingestion and evaluation.
- Applied machine learning to identify potentially fraudulent claims and deployed the system using Docker and Azure services.

MSA Quality Assurance System May 2026

React, PHP, MySQL, REST APIs, MVC, Chart.js

- Co-developed a university quality assurance platform for managing grade appeals, surveys, and analytics dashboards.
- Implemented role-based workflows for five user roles and bulk CSV/XLSX import-export functionality.
- Applied MVC architecture and Strategy and Observer design patterns to structure application logic and event-driven notifications.

Arcane – 2D Action-Adventure Game Jun 2026

C#, Windows Forms, Object-Oriented Programming

- Built a 2D action-adventure game in C# and Windows Forms without an external game engine.
- Implemented object-oriented game systems including real-time combat, enemy AI, RPG progression mechanics, and persistent save functionality.

JobConnect – Full-Stack Recruitment Platform Jan 2026

PHP, JavaScript, MySQL | **2nd Place, MSA DeepMinds Web Programming Competition**

- Led a team of six to develop a recruitment platform connecting students with employers through profiles, job listings, and applications.
- Implemented employer workflows for publishing vacancies and tracking applicants throughout the recruitment process.

Google Sheets Automation Tool Aug 2026

FastAPI, Python, SQL Server, Google APIs, OAuth 2.0

- Developed an application to automate repetitive data-entry and manipulation tasks in Google Sheets.
- Integrated OAuth-based authorization with the Google ecosystem to support application access to spreadsheet workflows.

GestureDesk – Hand Gesture Control Sep 2026

Python, MediaPipe, Computer Vision

- Developed a hand-gesture recognition application for controlling computer interactions through real-time camera input.
- Used hand landmark tracking to interpret gestures and map them to desktop control actions.

Additional projects: Top-Down Survival Shooter (Unity, C#), Retail Product Recognition (Computer Vision), EigenFace Recognition, Task Manager Desktop Application. See GitHub for the full portfolio.

Technical Skills

- **Programming:** C++, C#, Python, JavaScript, PHP, SQL
- **Software & Web Development:** React, Node.js, Express.js, FastAPI, REST APIs, MVC, HTML, CSS
- **Databases & Data Engineering:** SQL Server, MySQL, MongoDB, Apache Kafka, Apache Spark, Apache Airflow
- **AI & Data Science:** Pandas, NumPy, Scikit-learn, TensorFlow, Deep Learning, Neural Networks, Computer Vision
- **Cloud & Tools:** Microsoft Azure, Docker, Git, GitHub, Linux, OAuth 2.0, Windows Forms, ElectronJS, Unity, MediaPipe

Achievements & Activities

- **2nd Place, MSA DeepMinds Web Programming Competition** – awarded for JobConnect, a team-based full-stack web application.
- **Top Contributor, Elevvo Pathways Internship** – recognized on the program leaderboard for front-end project output.
- **Participant, MSA ECPC Community** – engaged in workshops and problem-solving sessions to strengthen competitive programming skills, and competed in ECPC 2025, solving algorithmic coding challenges.
